Dr.Sunil Pawar holds the credit of successfully setting up Markets representative network across . He has played a major role in setting up a huge clientele base by hosting regular events and presentations. He has also set up a strong network of partners for the organization.

# Manifesto

Hello,

We are all common people. We live our life happily. But one day a true human within us was awakened and we realised that we shouldn't live for yourself while living this beautiful life we realised many other aspects of life need to be looked at. While reading news paper, watching news, while discussing with friends and meeting various people we realised On one side India as a country is developing and reaching the success points in every field. We are happy and Proud to be an Indian. But on the other hand side we have also seen the other face of our country which is not acceptable and tolerable. When we look at other people around, it become difficult to have an eye contact with our Indian brothers.

We feel sad. But at times we feel why should we bother for those things that really doesn't matter to us. We as an individual are happy then why should we care. But, No We do care because we are a part of this nation and the society. Everything around us is somewhere connected between you, me and everyone around. Today if Gandhi, Tilak, Nehru, Molana Aazad would be alive what would we answer them. While fighting for the freedom our freedom fighters never dreamt of an emotionless, over practical and cunning india. Our history makes us proud, our freedom fighters were one side of coin and the other side is the day we see today which is questionable and so there is always one thought when will the murders, theft, corruption, ill treatment towards womens, black money corruption, poverty, farmers suicide cases will be permanently stopped.

Once called as golden sparrow our country is today under the burden of social problems. Population of 125 Crore is divided into cast religion and race. Is there anyone in this country who wish to make their own beautiful world. Britishers have already destroyed our foundation, our nation by making us slaves. Renowned in the entire world our Cultural Gurukuls were stopped by the britishers and planted british administration in india by changing the education system from gurukuls to convents. Our efforts is to demolish the unethical culture that britishers brought in India and plant the ancient culture of ethics again in our Country.

# Why Gurukul Concept?

Britishers ruled over India more than 150 years

Looking at the unity between different communities of India they attacked the bond shared between Indians

During british era, they required more employees for their administration and business purpose hence have offered employment to Indians on large scale they strongly used divide and rule policy so they have turned who wished to work under british government

For their convenience they have started to educate the Indian employees in the british manner which was completely different from the education of Gurukuls.

They have started missionary schools further known as convent schools. And forced Indians to take education from those convents and not Gurukuls. Moving forward the education system in India was entirely changed

With time Indians have completely adapted the western culture and are moving towards modernization which changed the ethics, value and morals.

Before 1835 we had Gurukul education system in India. Gurukuls are combination of practical education and spiritual education which is required for a mankind throughout his life.

So We Mission India Group have decided to build the cultural chains in India again as we have always been there and followed that.

# How Will The Gurukul Be

Along with the regular syllabus the ancient educational concepts are introduced to the students at Gurukul

Students in Gurukul are educated in a way that they become an entrepreneur instead of an employee

Gurukul offers free education to students from all age groups till age 8 years

Students will be focused with their skills and made active accordingly. Strongly believe in every individual shall be developed in those activities he is interested in

Gurukul is not limited to any caste & religion bars and so every candidates shall get equal education & training.

The dedicated team of Gurukul will look after the development of every individual candidate

Gurukul believes in developing the student in educated, capable human as well as a well cultured human being himself.

Looking back in ancient days there were rishimunis who runs the Gurukuls and saints educated people with their supreme knowledge and experience. Their superiority was not based on any grade or degree but they were valued and followed for one reason that was the amount of knowledge they have achieved from their skills and their will for public interest.

Based on the same pattern every student will be educated as well as he will be judged on the basis of his skills apart from grades.

Based on the interest a personal such as farming, sports, art, technology, education and any other skills individuals are focused on their likings and acts accordingly. Gurukul specialized team analyses those internal skills the students during their education.

Candidates working on projects and assignment will be paid and hence when they leave Gurukul they will have their own savings to start something and contribute to the society

# How We Will Develop The Gurukuls

Every Taluka will have one gurukul each

We will be appointing one business partner in each taluka and develop affordable but lavish houses for the middle class category. The profit we earn for every housing project will be used in Gurukul foundation.

Till 2035 Mission India Group has planned to join hands with 1000 business partners and the chain goes on. Students studying in Gurukuls will also spend 2 hours on earning for themselves which will create a feeling of hard work and benefits of hard work within them, students will utilise the self earned money for there education.

Every Business partner will run one Gurukul individually

We will be conducting special training and development programs for the business partners on how to run Gurukuls
